September, 2025

Your child, \_\_\_\_\_, will be provided with a TI-84+ graphing calculator for use in his/her mathematics class. This calculator will be for use during the 2024-2025 school year and **will be collected in June**. It is your child's responsibility to return the calculator to his/her teacher in **good working condition**.

Just as with a textbook, it is the student's responsibility to replace a calculator if it is lost or damaged. If the same calculator is not returned in good working condition, the student will be responsible for the replacement cost of \$100.00. A replacement calculator (TI-84+) may be purchased and returned in the original packaging to the library in lieu of paying the replacement cost. Students that have lost/damaged calculator covers or battery covers will be charged a \$5.00 replacement cost per part.

Additionally, as per NYSED guidelines, the responsibility for purchasing replacement batteries for the provided calculator is **on the student and/or parent or guardian**. The school district is not required to purchase additional AAA batteries beyond those that are first provided to the student at the start of the school year.

I agree with the above terms.

\_\_\_\_\_  
STUDENT SIGNATURE

\_\_\_\_\_  
PARENT SIGNATURE

Upon return of this signed agreement, a calculator will be issued by the School Library Media Specialist.

I have received the calculator listed below in good working condition.
